ADVANCED CARE.

Hundreds of lives saved.

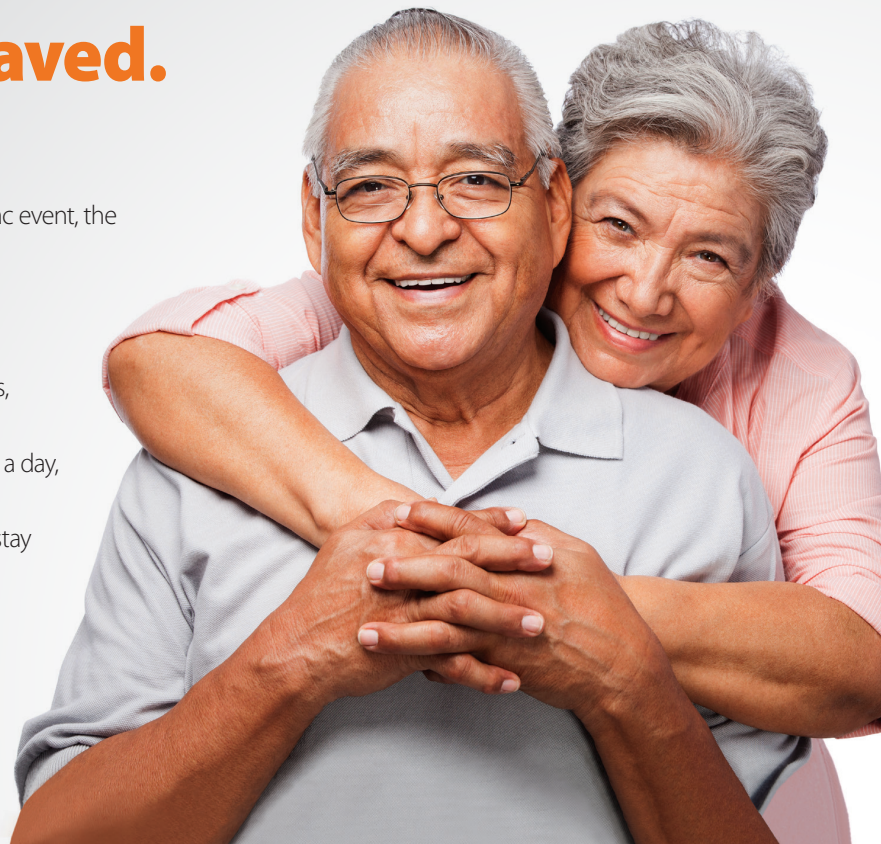

There is a saying in cardiology: "Time is muscle."

Meaning, the sooner doctors can restore blood flow after a cardiac event, the healthier the heart muscle and the patient will be.

Our Level II Cardiac Catheterization Lab puts time on the patient's side.

- ♥ Our cardiac team offers emergent and interventional solutions, including balloon angioplasty and stent placement.
- ♥ Our community has access to emergency heart care 24 hours a day, seven days a week.
- ♥ 90% of all patients who were previously transferred can now stay here locally for their cardiac care.
- ♥ We can provide the necessary treatment at Memorial, decreasing the time from diagnosis to restored blood flow – leading to healthier heart muscles and healthier patients.

It's lifesaving care, right here at home.
